Projects

Meeteor - https://meeteor.vercel.app/
Meeteor is a video conferencing application where users can create instant meetings, schedule meetings, record meetings, and join meetings from other users.
Built with Next.js, TypeScript, Clerk, GetStream, Shadcn, and Tailwind CSS.
filmastry - https://filmastry.keithprimas.com/
With filmastry, users can utilize The Movie Database (TMDB) API to search for movies and view relevant details such as star ratings and release date. The top 5 trending movies are displayed based on the number of searches by users.
Built with React.js, Appwrite, TMDB API, and Tailwind CSS.
